

MONO

The latest addition to the Omvivo Collection

Mono, created by renowned Australian bathroom designer and manufacturer Omvivo, is a contemporary interpretation of a classic profile. The clean lines and elegant shallow vessel show a restrained aesthetic that still retains a powerful presence, ideal for the modern bathroom.

The Mono basin can be partnered with the chic cylindrical pedestal or installed on bathroom furniture. Offering a luxurious alternative to the standard ceramic basin, the Mono is perfect for small powder rooms or larger more opulent bathrooms.

The Mono range will bring a luxurious element to any residential bathroom or commercial project including restaurants, cafes, hotels or office amenities.

The Mono basin and pedestal were recently selected by high-end residential developer Fridcorp for the bathrooms in the sophisticated Ivy apartments, St Kilda. Ivy, designed by Hecker Phelan and Guthrie is due for completion 2009.

Collection: Mono basin and matching Mono pedestal.

Mono basin materials: A range of natural stones and white Satine. Natural stone gives any environment a truly luxurious feel, with every piece being unique. Satine is a matt white marble and acrylic composite material that is extremely durable and can even be repaired if damaged, making it ideal for both commercial and residential areas.

Mono pedestal materials: A range of timber veneers and white Satine. The timber veneers selected by Omvivo are environmentally friendly and have been chosen for their striking texture and depth of colour.

Manufacture: The Mono vessel in natural stone and the Mono pedestal in veneer are manufactured in Australia, while the Mono vessel and pedestal in Satine are made in Italy to Omvivo's strict manufacturing requirements.

Designer: Thomas Coward, Omvivo's principal designer moved to Australia in 2004 from the UK where he was studying and working as a furniture designer. Since arriving in Australia, Coward has been designing products for Omvivo, as well as project and site-specific custom designs for commercial and residential projects. Coward's designs have a strong, contemporary edge with classic qualities making each piece unique, yet timeless. Omvivo won the 2008 IDEA award for Product Fixtures and Fittings for Coward's 'Dune' wall basin, to be launched early 2009.
