

The Urban MK II Vanity

Modern Australian design with a Nordic twist.

Inspired by evolving modern architecture, the Australian made Urban MK II vanities have been created to complement contemporary interiors while offering necessary storage.

The simplicity, minimalism and functionality of the Urban MK II vanities have a direct relation to Nordic design, and are perfect for creating uncomplicated and elegant spaces that are both beautiful and practical.

The Urban basin has a seamless integrated bowl with a refined 6mm profile, while the wall mounted vanity features an understated beveled finger pull allowing for a clean 'no handle' look. The matt white finish of the basin contrasts beautifully with the joinery finishes, producing a unified piece of furniture.

Soft close drawers and internal dividers in the Urban MK II cabinets create flexible storage options for modern lifestyles. The offset basin allows for much needed bench space and provides a point of difference.

Available in three single basin vanity sizes 700, 900 and 1200 with a distinct offset left hand bowl as well as a large double 1400 basin vanity; Urban MK II offers the flexibility so suit every bathroom.

"Urban MK II moves away from disposable products that are fashioned and manufactured with a use-by-date. They are making conscious and considered choices, selecting products that incorporate quality materials and manufacturing with timeless yet unique design".

Suzie Dyson – Omvivo General Manager
