

The KL basin is a uniquely modern design with gentle waterfall qualities and with its contemporary lines it is an impressive centrepiece for any modern bathroom. The KL, unlike traditional vessels, does not hold water, it simply flows to the back into the stainless steel grate creating a waterfall affect.

Manufactured from solid surface it has a smooth matt finish that is durable and easy to maintain which is ideal for residential and commercial applications. It is also available with softskin options giving your basin a beautiful two tone effect.

The KL can be wall mounted or installed on a bench top with wall mounted tapware. A 250mm wall outlet is recommended, with the water falling at a 90 degree angle directly down onto the vessel. KL is supplied with a waste and unique stainless steel grate.

SPECIFICATIONS
